01

CR - Car Retailers

The user stories we planned on doing this week:

US25
US07
US37
US34
US08
US33

The user stories we completed:

US25
US07
US37
US34

RISKS & MITIGATIONS

RISK

Time is an issue as we near the end of the module

MITIGATION

Ask for help to other teams and people outside of this module

RISK

Frontend is not moving as fast as backend

MITIGATION

Assign more people on frontend tasks rather than backend tasks

RISK

There are too many functionalities so testing is taking time away from development

MITIGATION

Assign a specific person / persons to only conduct tests

Successful Actions & Improvements

Successful Actions

- We finished with most endpoints.
- We worked well during semana tec.
- We communicated better with other teams to avoid misunderstandings.

Improvements

- Delegate tasks better in regards to their priority.
- Communicate better within the team to connect backend and frontend functionalities.

What will we do to reach our objective next sprint?

- Continue to seek support from members outside of the team (we need more people)
- Give priority to the frontend for next sprint.
- Start working on the module deliverables.
